

EASTER MEMORY GAME

Memory games are always a huge hit with kids especially when treats are involved. Kids of all ages can have fun trying to make matches of the Easter goodies by looking under each egg halves and trying to remember where the matching picture was. It's a quick and easy game to put together and can be fun for the whole family!

STEP 1

Crack open and separate the Easter eggs leaving the largest half of the egg for the game. You'll want to use the biggest part of the egg so that the small candies will fit perfectly underneath.

STEP 2

Print out the Easter memory game board. There are 3 different boards to print out so you'll be able to change it up and keep the kids guessing!

STEP 3

Put colored jelly beans or gold fish on each printed image on the game board.

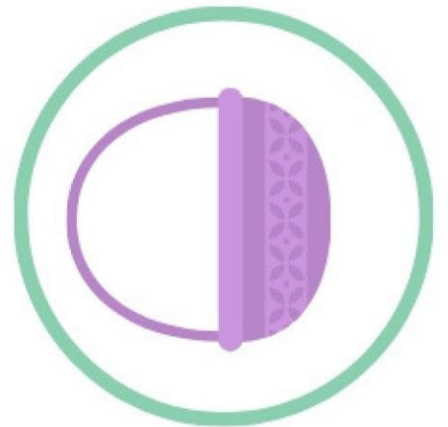

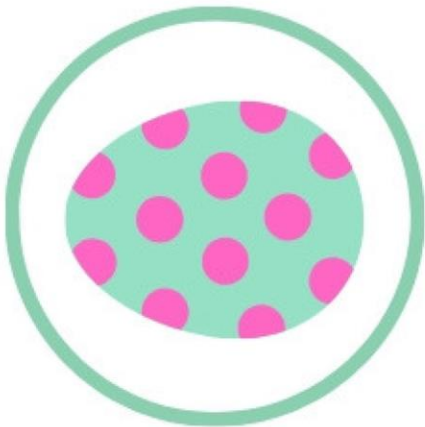

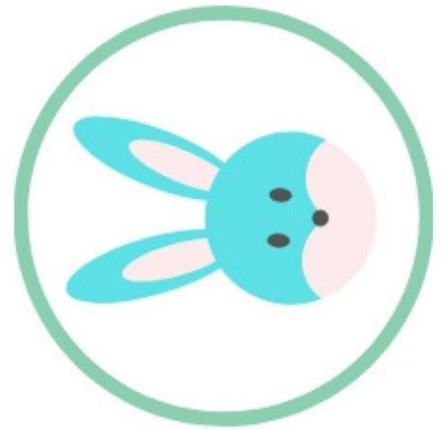

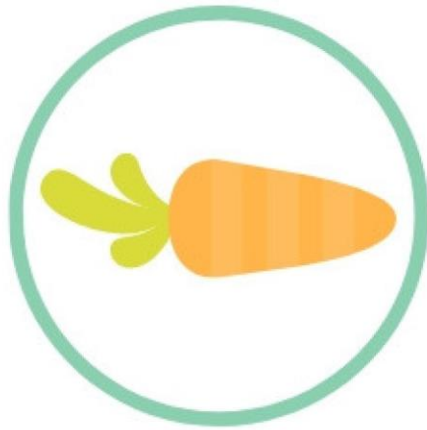

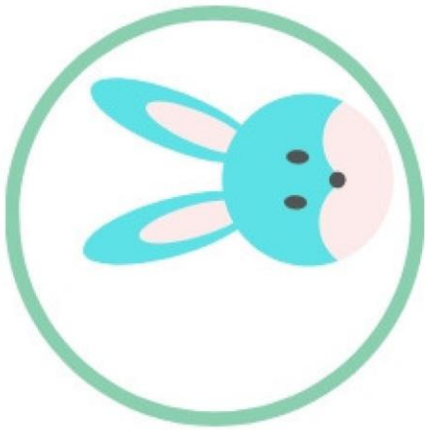

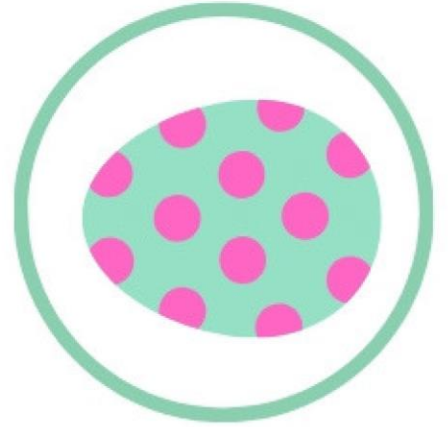

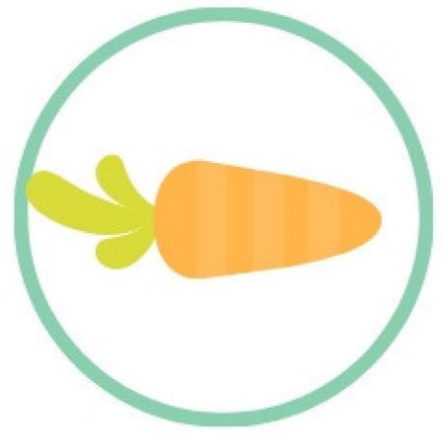

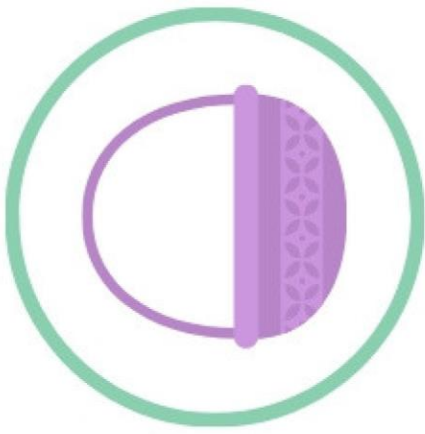

STEP 4

Place the Easter egg halves on top of the game board to cover up the Easter pictures.

STEP 5

Now the Easter memory game is ready to play! The first player selects two egg halves and turns them over. If the player finds a match, they get to take the treat and the next player takes their turn. If the player doesn't make a match, they place the egg halves back on top of the game board and the next player takes their turn. This game is fun for all ages, especially with the festive Easter twist!
