

Plastic Bottle Pig Plant Pot

Supplies Needed:

Acrylic paint
Felt
Googly eyes
Pen
Glue gun (or PVA glue)
Scissors

Instructions:

Draw a cut line around the bottle, approximately 15cm up from the bottom (this will be how tall your pig plant pot is). Make sure you draw two triangular shapes on the line for the pig's ears.

Mix the pink and white paint together until you have a pig shade of pink. Then paint the whole of the outside of the plastic bottle. Leave to dry.

Cut an oval shape and two triangles out of the pink felt to make the nose and inner ears. Then cut two small ovals out of the black felt for the pig's nostrils. Glue the black shapes onto the pink oval.

Finally, glue the nose, eyes and inner ears onto the pig. Color the feet with either a pink pen or pink paint, and you're done!
