

# MY TRIP to the vaccine clinic!

**Autism Society**  
Greater Akron

I am going to get the COVID-19 vaccine today.

It has medicine that will protect me from getting sick.

I will visit Lock 3 in Akron.  
There will be lots to see and do.

I will enter next to the concession stand.

People will be wearing masks inside.

I will check in at the table.

I will get a kit of things to help me!

I will wait for my turn.

My adult might have to fill out forms.

I can make a craft or color while I wait!

A nurse will take me to a private space when it is my turn.

It might have curtain walls.  
My adult can come with me!

I can tell the nurse which arm I want the vaccine in.

I will roll up my sleeve.

The nurse will clean my arm. It will feel wet and cold.

The doctor might use a tool called a shot blocker or a buzzy bee.

Shot Blocker

Buzzy Bee

A shot blocker has little bumps on it.

The doctor will gently press it against my arm.  
It does not hurt me.

A buzzy bee vibrates and has an ice pack.

It feels cold and goes against my skin.  
It does not hurt me.

I can use a fidget or hold someone's hand.

Now, the nurse gives me the vaccine.  
I will keep my body still and calm.

It will feel like a pinch.  
I can count to 3 and it will be over!

I will choose my band aid before the shot.

The nurse will put the band aid on my arm.

I did it! Now I wait for 15 minutes.

I can color, do a craft, or go to the Akron Children's Museum!

After 15 minutes, I am all done!

I am proud to be vaccinated!
